PROFESSIONAL SUMMARY

Technical Support Engineer with full-stack web and infrastructure experience, specializing in advanced system diagnostics, log analysis, and network troubleshooting. Proven track record of managing incident logs (ServiceNow, Freshdesk) and utilizing tools like PowerShell and Wireshark to reduce mean-time-to-resolution (MTTR). Adept at bridging the gap between end-users and engineering teams to resolve complex application and OS-level issues efficiently.

TECHNICAL SKILLS

Troubleshooting & Support: Ticketing Systems (ServiceNow, Freshdesk), Incident Management, Log Analysis (Event Viewer), Root Cause Analysis, Documentation.
Operating Systems & Networking: Windows, Linux CLI, TCP/IP, DNS, DHCP, Network Diagnostics (Wireshark, Nmap).
Programming & Scripting: Python, Bash, PowerShell (Task Automation), JavaScript, Node.js.
Application Support: API Diagnostics, REST APIs, Web Architecture (React.js, Express.js).
Security Operations: Vulnerability Assessments, Access Controls, Authentication Troubleshooting, Operational Security (OpSec).

PROFESSIONAL EXPERIENCE

CYBERZERO **Mumbai, MH, India**
Cyber Security Specialist (Technical Support & Operations) *08/2025 – 10/2025*

- Managed and prioritized incident logs within ServiceNow and Freshdesk, driving down ticket mean-time-to-resolution (MTTR) for complex technical issues.
- Utilized PowerShell, Windows Event Viewer, and network diagnostic utilities (Wireshark) to analyze OS-level event logs, identify system anomalies, and verify operational stability.
- Collaborated with cross-functional technical teams during an intensive 45-day deployment to resolve infrastructure issues and maintain operational efficiency.
- Conducted advanced network diagnostics and vulnerability assessments (Nmap) to identify and patch system flaws, ensuring secure and stable environments for end-users.

KEY APPLICATION SUPPORT & ARCHITECTURE

Soulbottherapy - Secure Mental Health Platform **React.js, Node.js, Custom AI Chatbot**
Full-Stack Developer & Support Architect

- Designed and supported a privacy-conscious, responsive web application featuring "Solululu," a custom-built NLU chatbot tailored for immediate user interaction.
- Hardened the application layer to maintain a secure, accessible digital environment for sensitive end-user data.

SMART-HEALTH - Healthcare Management System **Full-Stack Web Development**
Lead Developer

- Developed and documented a centralized healthcare management platform utilizing robust role-based access controls.
- Authored core synopsis and technical reporting documentation hosted on GitHub to streamline future deployments and troubleshooting.

AEGIS - Autonomous Penetration Testing Framework **Python, AI/ML**
Architect

- Engineered an automated engine designed to enumerate network system vulnerabilities via integrated scanning utilities.
- Enabled rapid prioritization of critical infrastructure vulnerabilities, reinforcing overall operational efficiency and system resilience.

EDUCATION & CERTIFICATIONS

Maharaja Agrasen College **Delhi, India**
Bachelor of Computer Applications (BCA)

- **CyberZero & The Cybersecurity Council:** 45-Day Intensive Cybersecurity Program.
- **Redynox:** Cybersecurity Task Assignment Certification.
- **Hashtag Jemtec:** Troubleshoot Ideathon Certificate.
- **Campus Leader (Hackbyte Codex):** Led the technical security community, driving developer engagement and peer mentoring.
