LinkedIn: linkedin.com/in/vivek-gautam-aa758b418 | **GitHub:** github.com/Kratos3213

PROFESSIONAL SUMMARY

Security Researcher & Autonomous Tooling Architect combining a strong foundation in full-stack web development with specialized expertise in vulnerability discovery. Proven track record of building automated offensive frameworks (Python/AI) to accelerate threat triage. Adept at source code auditing, network anomaly diagnostics, and bridging secure infrastructure with user-centric software solutions.

TECHNICAL ARSENAL

- **Offensive Security & Triage:** Burp Suite, Zaproxy, Metasploit, Nmap, Wireshark, Hashcat, Hydra, John the Ripper, Nikto, WPScan.
- **Security Operations (SecOps):** Vulnerability Assessments, Penetration Testing, Operational Security (OpSec), Log Aggregation, Logic Flaw Analysis, Reverse Engineering.
- **Programming & Scripting:** Python, Bash Scripting, TypeScript, JavaScript, C, C++, Kotlin.
- **Web Architecture:** Node.js, React.js, Express.js, HTML5, CSS3, Data Structures & Algorithms (DSA).

PROFESSIONAL EXPERIENCE

CYBERZERO | Mumbai, MH, India

Cyber Security Specialist | 08/2025 – 10/2025

- Conducted rigorous vulnerability assessments and penetration testing across client networks via Nmap and Metasploit to map and expose high-risk attack vectors.
- Utilized PowerShell, Event Viewer, and network diagnostic utilities to analyze OS-level event logs, identify system anomalies, and verify operational stability.
- Managed incident logs and vulnerability tracking inside ServiceNow and Freshdesk, enriching the internal threat knowledge base and driving down ticket mean-time-to-resolution (MTTR).
- Collaborated with senior industry specialists across diverse info-sec domains during an intensive 45-day operational deployment.

KEY RESEARCH & ARCHITECTURE

AEGIS — Autonomous Penetration Testing Framework | *Python, AI/ML*

- Engineered an automated offensive security engine designed to enumerate network system vulnerabilities via integrated scanning utilities.
- Implemented algorithmic threat scoring and dynamic report generation, drastically minimizing manual testing overhead for security teams.

- Enabled rapid prioritization of critical infrastructure vulnerabilities, reinforcing overall operational efficiency and system resilience.

Soulbottherapy — Secure Mental Health Platform | *React.js, Node.js, Custom AI Chatbot*

- Designed a privacy-conscious, responsive web application featuring "Solululu," a custom-built NLU chatbot tailored for immediate user interaction.
- Hardened the application layer to maintain a secure, accessible digital environment for sensitive end-user data.

SMART-HEALTH — Multi-Role Healthcare Management System | *Full-Stack Web Development*

- Developed a centralized healthcare management platform utilizing robust role-based access controls; authored the core synopsis and technical reporting documentation hosted on GitHub.

ADVANCED LAB RESEARCH, HACKATHONS & LEADERSHIP

- **TryHackMe (THM) Advanced Portfolio — [Top 1% Global Rank]:** Successfully penetrated and resolved **100+ highly technical practical labs, simulated SOC environments, and CTF networks**.
    - *Advanced Exploitation:* Fully compromised elite-tier boxes including **Anonymous Playground** (requiring advanced binary exploitation, custom scripting, and reverse engineering) and **Mr. Robot** (privilege escalation, web app logic flaws, and cryptography).
    - *Consistency Matrix:* Completed 24 back-to-back practical offensive/defensive labs during the *Advent of Cyber 2025* lifecycle.
- **Capture The Flag (CTF) Competitor:** Competed in the EscalateX V2 pre-screening (GLA University) and the Digital Manhunt online round as a core member of *Team Cyber Geeks* (GDG On Campus, IILM University).
- **Campus Leader:** Selected to lead the technical security community at *Hackbyte Codex*, driving developer engagement, CTF training paths, and peer mentoring.

EDUCATION

Maharaja Agrasen College, Delhi

Bachelor of Computer Applications (BCA)

CERTIFICATIONS & ADVANCED TRAINING

- **CyberZero & The Cybersecurity Council:** 45-Day Intensive Cybersecurity Program.
- **Redynox:** Cybersecurity Task Assignment Certification.
- **Hashtag Jemtec:** Troubleshoot Ideathon Certificate.
- **Arexa & Bharat XR:** SnapAR Hands-on Augmented Reality Lens Creation Workshop.
